👤 PROFILE

DevOps and Cloud Enthusiast with hands-on experience in designing and deploying scalable applications using Docker, Kubernetes, and AWS. Proficient in building and managing CI/CD pipelines with Jenkins to enable automated and efficient deployment workflows. Proficient in Infrastructure as Code (IaC), container orchestration, and cloud monitoring. Strong foundation in Linux and frontend development, with a focus on building reliable, scalable, and production-ready systems.

🧠 SKILLS

DevOps & Cloud :

Docker, Kubernetes, Jenkins, Terraform, AWS (EC2, VPC, S3, CloudWatch, SNS), CI/CD

Programming & Scripting:

JavaScript, Bash , Python

Frontend:

HTML5, CSS3, SCSS, React.js, Next.js, Material UI

Tools & Platforms:

Git, GitHub, Linux, Nginx, Docker Compose

Monitoring & Logging:

AWS CloudWatch

📁 PROJECTS

Zero-Downtime Multi-Region Application Deployment on Amazon EKS

- Designed and deployed a highly available application on Amazon EKS with zero-downtime deployments using Rolling Updates, Readiness Probes, and Graceful Pod Termination.
- Implemented Horizontal Pod Autoscaler (HPA) and Metrics Server to automatically scale workloads based on CPU utilization during traffic spikes.
- Built self-healing and disaster recovery solutions using Kubernetes Liveness Probes and Route 53 failover .

Containerized Next.js Deployment with GitHub Actions CI/CD

- Containerized a Next.js application using Docker.
- Built an automated CI/CD pipeline using GitHub Actions.
- Configured Nginx reverse proxy for efficient request routing.
- Automated Docker image build and push to Docker Hub.
- Deployed application to AWS EC2 through SSH-based automated deployments.

📖 PUBLICATIONS

International Journal of Innovative Research in Science Engineering and Technology 🔗

Published research on "Serverless EC2 Monitor & Control Dashboard" in International Journal of Innovative Research in Science Engineering and Technology (IJIRSET), focusing on cloud automation and cost-efficient system design.

📁 PROFESSIONAL EXPERIENCE

Front-end Developer Intern, Stackwit Organisation

11/2023 – 02/2024
Bangalore, India

- Implemented secure authentication using NextAuth, enhancing application security and session management
- Developed responsive UI components, improving cross-device compatibility and user experience
- Collaborated across the full SDLC including design, development, testing, and deployment
- Worked with deployment workflows and environment configurations during development
- Improved code maintainability by implementing reusable component-based architecture

🎓 EDUCATION

Bachelor of Computer Applications, Acharya Bangalore-B School

2020 – 2023

Masters in Computer Application (MCA), Jain University

2024 – 2026

Major Specialization in Storage and Cloud Technology & Minor Specialization in AIML
